Unlike many other foster care agencies, Adult and Child is uniquely qualified to address the emotional, behavioral, and medical needs of even the most challenging foster children.

We can give our children two lasting gifts ... roots and wings.

## Foster Care

Every child  
deserves a  
loving family.

Together, we can make a difference in the life of a child.

### **Therapeutic Foster Care**

Our Therapeutic Foster Care program provides extensive training to our foster homes to assist them in providing a nurturing and loving family environment to children who are placed in the child welfare system. Because Adult and Child is a mental health center, we have the ability to provide all the services that a child with severe emotional disabilities may need. Our TFC team will provide home and community based case management services to the child and the family, as well as, individual/family therapy, medication management, and 24 hour on-call crisis support services.

### **Shelter Care**

Our Shelter Care program is designed to serve the same population of children as we find in TFC, however, these children are placed on an emergency basis after business hours. The primary population served within this program include children from newborn to age 6. This program provides monthly, in home, case management and 24 hour on-call crisis support.

Therapeutic Foster Care (TFC) is a program designed to care for children of all ages who need intensive services and a safe, caring home which allows them to heal. Children/youth in this program suffer from a variety of emotional, behavioral and medical difficulties due to their painful pasts. Placement in a safe, loving home is the goal for every child that we serve. Some of our children will return to their biological families while others may need a permanent adoptive family.

**Every Foster Child is unique.** In fact, each child receives services based on their personal needs. Services are delivered using **The Wraparound model.** Many of our Foster Children experience some of the following symptoms:

- Serious emotional and behavioral problems
- Developmental Delays
- A history of failed placements
- Complicated medical concerns
- Significant educational challenges
- History of family disruption, neglect and/or abuse

### **One Stop Care Center.**

Unlike many foster care providers, Adult and Child is uniquely equipped to handle children with special emotional, behavioral, and/or medical needs.

Our Foster Care program provides access to these additional services:

- Psychological evaluation
- Psychiatric services
- Medication management
- In-house pharmacy services
- Therapy services
- Case management services
- Transition to adult services
- Post-adoptive counseling
- School-based Services
- Summer Camp
- Instruction in Acts of Daily Living
- Supervised Visitation
- Annual Foster Parent Institute
- Training
- 24/7 Crisis Support Services
